Aaron B Duke - Library

Aaron B Duke

662 N. Sepulveda Blvd., Suite 201, Unit B, Los Angeles, CA 90049

424.262.3853 aaronbduke.com

The Library was designed to have timeless style with modern luxuries. Design is not about furniture and fabric; it is about reflecting a lifestyle and creating a space that is comfortable and compelling. A library especially should be a sanctuary to relax and enjoy a good story. The wainscoting has been painted in a crackled leather color with walls painted a warm and creamy neutral. An assortment of fabrics in rust, taupe, and buttery cream ranging from velvet tiger to black and tan houndstooth gives the space interest and character. The design choices were influenced by the late Gerald Robertson, designer for the iconic Ralph Lauren flagship store. His story was one that impacted many people's lives and careers, including mine, and the Library is an homage to him.

Alicia Friedmann Interior Design – Powder Room

Alicia Friedmann

10621 Bloomfield St., Suite 10, Los Alamitos, CA 90720

562.455.0049 aliciafriedmann.com

The powder room is located under the main stairwell. Despite its tiny and hidden stature, the intent is to make this space a jewel box for this grand home. The design is glamorous and classic. It is also unexpected and like an art installation. Through having a black-and-white color palate, yet the room will feel bright and fresh because of the material choices: hexagon cement tiles on the floors, antique glass tiles on one wall, and floral-and-stripped wallpaper on the remaining walls and ceiling. The goal is for guests to take a deep breath, followed by a smile every time they enter the space. The breath will be because the vision is a bit surprising, the smile because the space is refreshing upon viewing.

CASA/WASY – Media Room

Susan Sawasy

1510 Oxley St., Suite F, South Pasadena, CA 91030

626.799.7755 casawasy.com

The Media Room is the perfect environment for family and friends. The use of automation allows the user to control lighting, window treatments, and audio/visual at the touch of a button. The closet has been converted into a petite wine room. Adjacent to the Master Bedroom and centrally located on the second floor, this sexy, high-tech space doubles as a private sitting room. Bringing the texture of grasscloth onto a portion of the ceiling draws the eye up to the custom painted mural that surrounds the Uni light. Metallic gold light fixtures provide interest to the rich color scheme. The use of plush textures in the fabrics contrasts with the sleek metal and glass elements in the furniture. The room is grounded by the bold pattern on the floor.

D Christjan Fine Cabinetry Design & Manufacturing – Kitchen

Phil Vonk

This kitchen was designed to be a light airy room filled with a mix of materials and finishes that bring old-world charm. Porcelain tile in a limestone color graces the floor; ceramic tile lightens the space with soft colors and textures; and an oil-rubbed bronze hood adds old-world appeal to the range. Porcelain counters in a faux marble top the custom-made cabinetry. The lower cherry cabinets feature a brown sugar stain, while the upper cabinets, painted with a light glaze, extend to the ceiling for maximum storage. The exquisite china hutch is adorned with beautiful carvings likely to be found in a distinguished English estate. The new dining area and curtains help soften the kitchen's hard edges and a cozy upholstered bench, designed to look like a settee, invites you to relax and enjoy casual meals.

A wall of windows floods natural sunlight onto the high ceilings of this chameleon-like space. Traditionally used as a service area of the home for staff alone, this multi-tasking area has been transformed to suit the needs of the modern, fast-paced family lifestyle. That means it can function as a laundry room, mudroom, potting room, prep station, gift wrapping area, office or a family command station. A new deep utility sink with an air circulation mode for washing delicates and custom cabinetry allows the function of the room to increase beyond its size. Updated plumbing fittings, new decorative lighting, refreshed materials and a clean, crisp color palette round out the room to make time spent in this area anything but a chore.

David Reaume Construction & Design – Dining Room

The Dining Room displays modern elegance mixed with eclectic and emblematic pieces. Crowned by a twisted Venetian glass chandelier, the botanical theme with abstract accents from the adjacent Conservatory can be felt. A soft, antiqued Borchese finish gives the English wall paneling a contemporary feeling. The dining set, in a dark warm walnut with antique golds is softened with muted grays and awakened with ivory, white and silver botanical place settings. While calming and luxurious, these pieces emphasize elements of quality and comfort. The room is versatile, beautifully layered and very livable. The Blossom Mirror, inspired by a kimono with cherry blossoms rendered in an Art Deco manner, lightens up the room. Finally, white silk draperies are the perfect partner to accentuate the white birch wall covering with sparkling silver accents.

The influence of what was an outdoor garden when the house was originally built has become the theme for our Conservatory and adjacent Dining Room. The oversized black and white botanical wall covering reminds us of what the room once was, while lending a contemporary backdrop to our relaxing sitting room. The vintage elegance is balanced with a flirtatious wit, elicited by the gray lounge chairs and citrine terraced cocktail tables with an antique silver finish. Billowy white sheers allow for plenty of nature light to pour in during the day and the evening is lit with spun silver nest pendants hanging above. Finally, large silver and bronze petal mirrors give a sparkling accent, while the room is grounded by a smashing geometric French encaustic tile floor.

This “Seaside Escape” master suite affords the perfect haven to withdraw from the demands of contemporary life. The calming color palette’s restful blues and neutrals offers an enticing, tranquil backdrop for a fusion of new furnishings, vintage pieces, patterns and textures. The luminous, watery envelope of the muted wall treatment recalls the gentle ebb and flow of the tide. Original hardwood floors, refinished, are granted new life, while the new tile reinvigorates the fireplace surround. Fabrics in complimentary hues vary from cut chenille to glazed linen to the lusciously tactile wovens. Traditional furnishings lend freshness to the space—under the

watchful gaze of a 50 million year-old fish fossil-topped console. Meanwhile, a drop-down flat-screen TV offers on-demand technology at the swipe of a fingertip. The very best of the very old and the very new!

Home Front Build – Master Bathroom

323.732.4663 homefrontbuild.com

Awash in harmonious textures, the Master Bathroom is the heart of the “Seaside Escape” master suite. While its configuration presented challenges, a thoughtful rearrangement of fixtures, along with rough plumbing improvements, results in an enlarged, generous layout. A sculptural soaking tub with mirrored exterior offers a reference point for the generous shower, twin medicine cabinets and “freestanding” vanities, and separate toilet compartment. A soothing blue, richly textured tile wainscot surrounds the room in an aqueous ambiance. In contrast, the shower showcases more curvilinear tiles, in pale aqua. Offsetting the cool hues of the abundant tile work, a sandy-toned quartzite tops the vanities lending an earthy warmth to the palette. Old-world craftsmanship is highlighted by intricate tracery work, dancing lightly overhead, offering this refreshed sanctuary a delightful connection to its historic past.

At the inner sanctum of the master suite, enrobed in the riches deep-ocean blues, lies the Master Sitting Room. This cozy enclave, sheathed in a subtly textured wallcovering of mottled navy blues, features new hardwood flooring and a ceiling of hand-troweled integral colored plaster. Enticingly textured fabrics cover a pair of swivel chairs, as well as the drapery, while concealed speakers add to the sensual allure of this gem of a room. A deco bar cart beckons in the corner, inviting visitors to stay for a while and chat, relax with a drink, and catch up on the latest news—or the latest movie—on the wall-recessed flat screen. Diminutive though it may be, this special space offers a unique opportunity for relaxation, connection and restorative escape.

707.206.1987 jessicatodaydesigns.com

The Back Staircase was inspired by a recent trip to the awe-inspiring Scotland and then was transformed into its own counter movement of minimalism combined with classical elements. Collectively, the entire setting can be described as warm, organic and refined. The design includes monochrome walls, light wood floors, minimal accents, green hues and a generous collection of original artwork. The evolution of this area only begins with aesthetics. With its breathtaking art, captivating colors and artisan woodwork, the Back Staircase has evolved into a cozy and distinctive space.

L'Esperance Design – Foyer & Staircase

Paul L'Esperance & Daelen Cory

505 N. Robertson Blvd., West Hollywood, CA 90048

310.385.9400 lesperancedesign.com

Stand at the base of the staircase and look up towards the vaulted ceiling. Experience the grandeur of entering a cathedral. Inspired by the plasterwork at Monasterio de la Cartuja, Spain, we implemented modern technology to design and print the ceiling on fabric creating a high-tech Trompe-l'oeil. We incorporated the floral medallion from the original 1916 zinc stained glass window in our wall fabric design. By transforming the wooden wainscoting with hand-painted panels interpreting Carl Gustav Carus' "Landscape with a Strand of Trees," we bring the beauty of the gardens to the interior giving the illusion of looking through windows. The use of a floral silk rug, velvet blush sofa, alabaster lamps with the juxtaposition of vintage and modern elements makes this area an intimate lounge for guests.

L'Esperance Design – Upstairs Gallery

Paul L'Esperance & Daelen Cory

310.385.9400 lesperancedesign.com

Natural sisal runners bound with canvas, guide you from the main staircase to the master bedroom vestibule and cove. Original zinc windows with unstructured translucent Roman shades diffuse the sunlight. Fine furnishings, exceptional artwork, custom lighting and accessories create an intriguing journey to the many upstairs destinations. The skeuomorphic fabric we designed and printed for the walls and barrel vaulted ceiling, mimics the 3-D look of hand-carved plasterwork through the use of Trompe-l'oeil effects. The floral medallion from the original 1916 zinc stained glass window was incorporated into the wall fabric design.

Michael Wrusch – Ladies Office

3009 E. Anzuelo Circle
Palm Springs, CA 92264
310.738.4811

The smallest room in the house, a former linen closet, has been transformed into a cozy but highly functional office. Custom woodwork enhances the work desk with file drawers and a pull out charging drawer for electronic devices. The upper cabinets are part function and part art exhibit with a collection of antique Chinese porcelain tea caddies on display. Beautiful leaded windows, original to the room, form a lovely backdrop for an antique gothic chair flanked by two delightful windowsill boxes of flowers. Upholstered walls of a hammered silk provide a soothing and quieting background for an antique gothic cabinet that holds a printer and office supplies. A ceiling mural highlights the architecture and gives a feeling of openness to the compact room.

Robert Frank Interiors – Living Room

Robert Frank
300 South Raymond Avenue, Suite 12
Pasadena, CA 91105
626.765.1750 www.robertfrankinteriors.com

Our goal was to transform the Living Room into a bright and casual living space; a place to entertain guests, while also being comfortable and functional for the homeowners. A textural ivory grasscloth wallcovering was installed and new window treatments were selected, opening the beautiful views to the exterior. The room was kept casual with textural linen, cotton and raw silk fabrics. Color was selectively incorporated into the room with classic navy, periwinkle and gray fabrics and accessories. A classic design aesthetic was infused to ensure that the Living Room will remain timeless and serve as a peaceful retreat for family and friends for many years to come.

SGS International, Inc. – Guest Bathroom

CICI Han, Tingting Lu, Samuel Kuo & Sidney Chang
112 N. Earle St.
San Gabriel, CA 91775
626.427.0289

Providing an opportunity to celebrate volume and space, this design uses architectural elements, such as interlocking of massing, solid and void, and the composition of textures to define distinct areas throughout the room. Today, a bathroom need no longer to be just useful; it can be a space where one experiences light, color, texture, depth and scale. A floating countertop with a simple vessel sink has been introduced to streamline the area and a custom-designed open-shelf element is designed to meet both architectural and utilitarian goals. The solution presented here is not two-dimensional, it is a subtle three-dimensional interlaced design that guides the eyes through the elements of each space and allows the visitor to forget it is a confined, shared bathroom.

With minimal change to its structure, we sought to bring a modern twist to the formal English style of the house. We mixed contemporary furniture and accessories to transform the space into a lively, updated, yet cohesive, outdoor area where the traditional and new co-exist harmoniously. Besides blending styles, we intentionally created a warm seating and dining area from which the park-like property can be appreciated. The swivel chair and sofa are great in this location! We selected only functional pieces made with the most sophisticated material, such as the recently released faux concrete dining table top. All were chosen to withstand the weather. The colors pop against the live green wall, while the colorful rug made of nautical rope ties the entire space together.

I know a bank where the wild thyme blows, where oxlips and the nodding violet grows, Quite over-canopied with luscious woodbine, With sweet musk-roses and with eglantine. –A Mid-Summer Night's Dream, William Shakespeare

Reaching back to England's rich Tudor period and more recently the Tudor Revival style in architecture, our Shakespeare Garden presents plants and flowers like roses and columbine from William Shakespeare's many writings. Adjacent to the planting beds are two large succulent mosaics whose design is inspired by a ceiling from the great Hampton Court Palace. This colorful drought tolerant garden is a profusion of tile, gravel and lush sculptural succulents planted in tight formation. Pathways are ornamented with charming, hand-crafted concrete pavers in the turf, punctuated by a sitting area, where the sonnets and plays of the bard can be pondered.

Town & Country Event Rentals- The Restaurant at Showcase

John Ferdenzi

7725 Airport Business Parkway, Van Nuys, CA 91406

818.908.4211

Los Angeles in 1916 was a revival of stately East Coast and European styles combined with the industrial age. Both styles are echoed within John's design for the Wisteria Terrace. Utilizing Town & Country Event Rental's exceptional and diverse inventory and construction capabilities, this comfortable and inviting restaurant combines bold elements of black brick walls, deep stained wood tables, bentwood chairs and cathedral bench seating while paying homage to the soft pastels of wisteria through drapery and table linens. Harkening back to ages past, there is pre-industrial gas lighting with hanging lanterns in conjunction with large Edison period time pieces and Edison lighting elements. The Wisteria Terrace dining room extends through to a bar seating area, which has open access to an outdoor lawn seating area.
